

Top Company Interview Questions - Introduction to Data Structure

Disclaimer: When compiling related questions from each lesson, note that not all of them will have answers explicitly mentioned in the material. For such questions, you are encouraged to use ChatGPT and other credible references to find and understand the answers.

1. What is a Data Structure and why is it important in programming? (TCS, 2023)
2. Why do we need Data Structures when we already have variables and arrays? (Infosys, 2021)
3. How does choosing the right data structure impact program performance? Give an example. (Wipro, 2022)
4. What is the difference between Linear and Non-linear data structures? Provide two examples for each. (Accenture, 2023)
5. What are CRUD operations? Give real-world examples (Capgemini, 2024)
6. How do you decide which data structure to use for solving a particular problem? (Amazon, 2022)
7. How does understanding data structures help in optimizing algorithms? (Amazon, 2021)
8. What are the limitations of linear data structures, and when should we use non-linear ones? (Infosys, 2023)
